Here are some specific facilities provided for women by CWDC:

- **Separate common rooms:** These dedicated spaces offer a place for women to relax, socialize, and study in a secure environment. They are equipped with amenities like restrooms, first-aid kits, and emergency contact information.
- **CCTV surveillance:** Cameras placed in public areas can deter crime and assist in identifying and capturing it.
- **Security guards:** Trained security guards patrolling the campus, especially during late hours, provide a visible deterrent and can respond to emergencies.
- The most likely objective is to maintain order and ensure the safety of female students using the common room, there is a female security guard at the common room.
- This could involve:
 - **Monitoring the common room for any suspicious activity.**
 - **Responding to emergencies or incidents.**
 - **Enforcing the rules and regulations of the common room.**
- **Self-defence training:** Workshops on self-defense techniques can empower women with the ability to protect themselves in potentially dangerous situations.
- **Counselling the students:** CWDC committee empowered female student by providing guidance and resources to help them make informed decisions, solve problems independently, and develop skills to manage their well-being. This could involve offering information on relevant support groups, workshops, or external resources available to women on campus or within the community.
- College has discipline committee which contributes to women's safety by maintaining a safe and respectful environment. The committee is primarily responsible for maintaining order and enforcing the college's code of conduct; it can also play a crucial role in promoting a safe and respectful environment for all students, especially women.
- The suggestion box for female students which placed in our college, proved to be a valuable tool in understanding their needs and perspectives. By actively addressing their suggestions and fostering an open communication environment, the college can create a more inclusive and supportive learning environment for all students.

Menstrual hygiene management is a fundamental human right for women and girls. Sadly, limited access to safe and sanitary menstrual hygiene products remains a significant barrier, negatively impacting their health, education, and overall well-being. This challenge is amplified in college environments where students may face inadequate resources, causing discomfort and potential hygiene concerns. Our college recognizes this necessity and has taken a proactive stance by purchasing equipment to enhance menstrual hygiene support for our female students.

Equipment:

Insulating Machine: This machine will be used to dispense sanitary pads and other menstrual hygiene products. It will be installed in a designated location with convenient access for female students.

Vending Machine: This vending machine will be stocked with a variety of menstrual hygiene products. Students can purchase these products using a payment system integrated into the machine.
